What others say about this ebook:

Review 1:

I like the Emanuel supplements overall. This book really helped when studying for my IP final because it quickly and clearly breaks down the different areas of IP. It helped me review the concepts and types of analysis in combination with my outline.

Review 2:

Text arrived in better than expected shape and in a timely manner. It was almost brand new. I would highly recommend purchasing future texts from this person.

Review 3:

Summary: the worst Emanuel outline

Disclaimer: I am a longtime Emanuel user and prefer it to Gilberts. However, this book is incredibly disappointing for 3 primary reasons:

1. It gives an incredibly superficial treatment to even the most complicated subjects. Example: the "utility" standard - discussed in 35 U.S.C. 101 and 102, is given LESS THAN ONE (1) PAGE of discussion. Disclosure, 35 U.S.C. 112, is given ONE AND A QUARTER (1.25) PAGES of discussion. This is simply unacceptable to anybody wanting to know more than a cocktail discussion's worth of information.
2. It provides scant case law support. Much of the information is presented without citing to cases or statutory authority - the author merely gives a proposition, but gives no history, facts, or cites to cases or statutes to support that conclusion. Those reading this book have most certainly taken civil procedure, so I give this analogy: the author's methodology would lose to a 12(b)(6) motion because it relies so much on conclusory allegations that were so disfavored in Twombly/Iqbal. Example: the "utility" section mentioned in my #1 CITES ONLY TWO (2) CASES in the entire section. There are easily 10+ important cases in this area that are critical.
3. Poor organization: this outline is more blocks of text than any kind of outline. There are too many uniform text paragraphs and not enough organization and breakdowns of how topics flow together. This defeats the "outline" portion of Emanuel Outlines.

Review 4:

This book will lead you wrong.

According to the book, "to constitute a trade secret, the information must be substantially secret and have commercial value to the claimant that can be attributed to the fact that the claimant has it and its competitors do not".

However, the generally accepted definition of a trade secret is information that (a) derives independent economic value from not being generally known to the public or to other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy. To a lay person, the difference may seem trivial, but to someone using this book (a law student using it to supplement his/her studies), the difference is between an A grade and a C or lower. It's like having brain surgery and having the surgeon ask the nurse for "one of those sharp things on that tray."

Review 5:

The seller ship the book I ordered reasonably quick and I received it in the same condition as it

was advertised. I have no complaints and would buy from this seller again. As to the book that I ordered, I have been reading Emanuel outlines for several years and think that they are the best outlines in their class.
